Subject: Clarification Requested on subjects DOB data allowed to be collected per local regulations
Date: Friday, January 09, 2015 12:47:57 PM
Importance: High

Good afternoon –

I can speak to federal FDA regulations only. There is nothing that prevents a sponsor from collecting personal information about subjects in their studies including DOBs. (Most, if not all, of which would be considered PHI under HIPAA). However, sponsors do not really need this information as their monitors and auditors can ensure that the data they receive coded for analysis does indeed come from specific study subjects who exist. Therefore, in most cases sponsors have refrained from collecting this type of information. However sponsors can ask and receive the requested information.

You might want to review this guidance documents listed below.

Oversight of Clinical Investigations – A Risk Based Approach to Monitoring
<http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/UCM269919.pdf>

The ICH GCP E6 Good Clinical Practice: Consolidated Guidance, (which is recognized as official FDA guidance) mentions in section 6.10 that the sponsor should ensure the protocol or other written agreement specifies who has access to source data/documents (you can access this guidance at <http://www.fda.gov/downloads/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/ucm073122.pdf>). I've copied below section 6.10 and other relevant sections of the ICH GCP E6 guidance for your consideration

6.10 Direct Access to Source Data/Documents

The sponsor should ensure that it is specified in the protocol or other written agreement that the investigator(s)/institution(s) will permit trial-related monitoring, audits, IRB/IEC review, and regulatory inspection(s) by providing direct access to source data/documents.

Direct access is defined as:

1.21 Direct Access: Permission to examine, analyze, verify, and reproduce any records and reports that are important to evaluation of a clinical trial. Any party (e.g., domestic and foreign regulatory authorities, sponsors, monitors, and auditors) with direct access should take all reasonable precautions within the constraints of the applicable regulatory requirement(s) to maintain the confidentiality of subjects' identities and sponsor's proprietary information.

It is expected that all parties involved with a study maintain the confidentiality of subject records and the extent that it is feasible is to be discussed as part of the informed consent process and be included in the informed consent document. The IRB is most often included in the informed consent document as one of the parties who may have access to the subject's records.

You may wish to consult the Health Insurance Portability and Accountability Act (HIPAA) For questions regarding issues pertaining to HIPAA, you may contact OCR directly at OCRPrivacy@hhs.gov. Here also is a link to OCR's general website for HIPAA <http://www.hhs.gov/ocr/privacy/>, and OCR also has HIPAA Frequently Asked Questions that can be accessed at <http://www.hhs.gov/ocr/privacy/hipaa/faq/index.html>.

I hope this information is helpful. Please contact us again at gcp.questions@fda.hhs.gov should you have additional questions.

Kind regards,

Doreen M. Kezer, MSN
Senior Health Policy Analyst
Office of Good Clinical Practice
Office of the Commissioner, FDA

Subject: Clarification Requested on subjects DOB data allowed to be collected per local regulations
Importance: High

To Whom It May Concern,

Can you please provide me with information on our local regulations pertaining to the collection of subjects' date of birth which can be collected for research studies? Is it allowed and if so, what data is allowed, birth month and year or just year?

Any clarification you can provide is greatly appreciated.

Best Regards,

[REDACTED]
